DETAILED ACTION

1. Applicant's response filed on 12/19/2005 has been fully considered. Claims 1-6 are pending.

Priority

2. Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a translation of the foreign application should be submitted under 37 CFR 1.55 in reply to this action.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taguchi (US 2004/0011247 A1).
5. Taguchi discloses ink jet ink composition printed on an image receiving material comprising a support and an image receiving layer on the support, wherein a paper or plastic film can be used as the support ([0170]-[0173]). The image receiving layer comprises light fastness enhancer such as benzotriazole [0180]. Taguchi does not disclose the amount of the light fastness enhancer. The experimental modification of this prior art in order to ascertain optimum operating conditions fails to render

applicants' claims patentable in the absence of unexpected results. *In re Aller*, 105 USPQ 233. One of ordinary skill in the art would have been motivated to adjust the amount of the light fastness enhancer in order to optimize the light fastness property of the layer. A prima facie case of obviousness may be rebutted, however, where the results of the optimizing variable, which is known to be result-effective, are unexpectedly good. *In re Boesch and Slaney*, 205 USPQ 215.
